PROPOSAL FOR ST. JAMES THE GREAT ONLINE PRESENCE

Online presence gives the church an easier way to get to people as different locations at any given time, the requirements for the accomplishment of this are:

- The online software
- On ground Administrator(s)
- The yearly payment for the domain name (i.e. www.stjames.com) and hosting the site online.

The online software- These is to do with the website, online directory, online members management (which includes sending on messages to members, sorting their birthdays for bulletin, sending them a seasonal or emergence messages etc.) and lot more functions.

Presently, we have the church website as the only one available for display and approval.

On ground Administrator(s) - It's expedient that administrators are empowered by the church to update request information and current happenings of the church. The empowerment requires the *training of these persons* and the *constant monthly data subscription* for these persons either on church laptop or whichever device that they are using for the updating.

Also, we are also available for consultation for *training of these persons (2 or 3 youths or youth-stars)* that are presently available and they **must** train at least one person to take over from them 2 months before vacating the position or leaving the environment.

 The yearly payment for the domain name and hosting – The yearly domain name and hosting fees are to be paid. The price differs by companies with each different functionalities. A considerable company with an affordable price are www.namecheap.com , www.whogohost.com and some others have both domain name fee and hosting fee below #20,000/year for a start. The price changes as Dollar exchange rate changes.

THANK YOU
